

NEW-YORK HOUSEHOLD MARKETS.

Reported Express for The Tribune.

WASHINGTON MARKET, Tuesday, July 25.

A warm and pleasant day for trade, defective only, if at all, in the degree of heat. There is nothing materially new in the market, except the Egg-Plant, a few fine specimens of which have appeared. Produce is brought in very sparingly, we saw the first landings near the Market-street boats loaded with choice things for the use of the great public—one small schooner was plentiful stowed with two varieties of Melons, from New-Jersey, we understand. No steady price was ascertainable, however, very few or none of this fruit (or vegetable?) being on sale made the Market at retail.

Complaints, by the way, are freely made of the insufficiency of the accommodations in Washington Market. The fact is both publicly discussed and boasted in our City papers, that those who pay the very best prices for stocks have almost the least accommodation, & it is only in the greatest difficulty any customer can procure one of the most important of the places given away. There are some 600 country houses shown in the middle, the date-stamps, corners, to say nothing of the dirt and mud of this place, and the tight fits for stanchions render us neither convenient nor wholesome. Gentlemen of the Common Council WASHINGTON MARKET is not large enough for the transaction of its immense trade, and sadly needs enlargement. While the City is expanding, its population increases in like ratio, and amid all this growth it is clear Mart should be no means allowed to stand perfectly still, with no enlargement or convenience of communication between different parts thereof unless through much subdivision, amid divers access, barrels and cart-roads, minims, for which there is no room in the city. For the welfare of the public and of the Market already, let any one take his own observations.

A third more produce is brought in every two or three days, to serve as a supply, but hardly increasing in quantity, and the place must be held for its reception. Washington M'st is admirably situated above all others, for convenient access to the River, and a good market. We have had a number of cases reported to remedy the evil of its cramped and crowded state. Among them is a recommendation that the central pier be extended further into the stream, and then have at least half its length filled in. This would give the market and grocer's wagons, which now block the pier, a wider space to turn about. The other would be to bring to a convenient focus, the outer-houses and the fish-servet, at the outer end of the pier. This would be a great improvement to the place. But by far the best thing would be to extend the market to accommodate the market itself. Will not our City Council think of it?
